HOUSE OF NOMA

THE AI OPERATING SYSTEM

From Strategy to Systems.
The Intelligence Layer Behind House of NOMA.

01 STRATEGY

The Vision & Playbook

02 BRAND VOICE

The Foundation

03 AI AGENTS

The Operators

04 COMMAND CENTER

The Interface

The Story So Far

01

The Strategy Deck

Brand philosophy. 11-year legacy. $554B market opportunity. Drop architecture. Revenue projections. The vision for House of NOMA.

02

The Execution Playbook

Five phases. 16 weeks. Klaviyo, content engine, influencer pipeline, drop launch system, wholesale & PR. The build plan.

03

The AI System

The intelligence layer that executes the playbook. Agents, brand voice, command center. This deck.

The Gap Between Strategy and Execution

0

Klaviyo flows running

Platform exists. Flows don't.

0

Influencer pipeline

Cosigns exist. No system.

0

Drop launch system

Drops happen. Not repeatable.

1

Person executing all of this

Amon is a creative director.

An AI System Built Specifically for NOMA

Not generic AI tools. A custom-built operating system that knows NOMA's voice, strategy, and playbook.

BRAND VOICE DOC

The foundation. NOMA's identity, language, and rules loaded into every agent.

SPECIALIZED AGENTS

Instagram Curator, Drop Launch, Klaviyo Builder, Analytics Reporter — each expert knows their job.

COMMAND CENTER

Simple interface. Amon picks a task. The right agent fires. A real deliverable comes out.

THE SHIFT

Manual execution	**Agent execution**
Hours per task	**Minutes per task**
Generic AI output	**NOMA-specific output**
Amon as operator	**Amon as director**

How It All Connects

STRATEGY DECKS

Brand vision + 5-phase execution playbook

BRAND VOICE DOCUMENT

NOMA identity, language, tone, and rules — shared context for every agent

SPECIALIZED AI AGENTS

8 agents, each expert in one domain, all knowing NOMA

COMMAND CENTER

Simple interface — Amon picks a task, agent delivers

The Brand Voice Document

The foundation everything else depends on.
Garbage in, garbage out. This is how we avoid that.

NOMA Website
[Scraped]

Brand copy, product descriptions, collection language

Instagram Captions
[Scraped]

Chronological — shows how voice evolved

Press Coverage
[Scraped]

Highsnobiety, Harper's Bazaar, CFDA, Essence

Amon Voice Memos
[Human Input]

How he talks about NOMA unprompted — the gold

NOMA Is NOT
[Human Input]

Words, vibes, brands explicitly excluded

The Real Customer
[Human Input]

Who Amon pictures when he designs — not the deck version

The Output Agents

Marketing · Content · Growth · Analytics

Instagram Curator
Phase 2

Content calendar, caption drafts, pillar rotation

Content Creator
Phase 2

Editorial series, Art Through Fabric, Archive Project

Drop Launch Orchestrator
Phase 4

T-14 to T+3 checklist, all drop copy, timing

Outbound Strategist
Phase 5

Wholesale outreach, press pitches, partner targeting

TikTok Strategist
Phase 2

NOMA.WAV content, trend-responsive series, growth

Ad Creative Strategist
Future

Meta ad copy, creative testing, paid social assets

Influencer Researcher
Phase 3

Creator scoring, seeding database, outreach drafts

Analytics Reporter
Ongoing

Weekly KPI dashboard, performance against playbook targets

The Creative Ops Division

The agents that plan the work, manage the projects, and keep production moving.

Trend Researcher

INTELLIGENCE

Weekly culture briefings, competitive intel, pre-drop trend analysis. Feeds creative direction into every project before it starts.

Studio Producer

PORTFOLIO

Full 16-week roadmap oversight. Sees all active projects simultaneously, detects resource conflicts, flags timeline collisions before they happen.

Project Shepherd

CAMPAIGN

Per-drop production timeline. Photographer, models, location, shot list, assets, deliverables, deadlines — every campaign runs as a real project.

Studio Operations

DAILY

Daily execution checklist. What's due today, what's blocked, what decisions are needed. The engine that keeps everything moving.

INTELLIGENCE → PORTFOLIO → CAMPAIGN → DAILY EXECUTION

Inside One Agent: The Drop Launch Orchestrator

T-14 HYPE	T-7 REVEAL	T-1 FINAL PUSH	T-0 DROP DAY	T+3 POST-DROP
Teaser content brief · Klaviyo hype email · Influencer seeding list	Full collection reveal copy · Preview email · SMS first access script	'Tomorrow' email · SMS alert · Final Reel brief · All links checked	Drop email + SMS blast · Social posts · Real-time monitoring checklist	Sold-out callouts · Restock capture · Performance review template

The NOMA Command Center

Amon doesn't touch Claude Code.
He opens a clean interface and picks a task.

NOMA COMMAND CENTER

- Generate this week's Instagram calendar
- Write the drop announcement for SS26
- Draft wholesale outreach to SSENSE
- Build the Klaviyo welcome flow
- Run the weekly analytics report

No terminal required

Amon never sees code or command lines

Task-driven UI

Pick what you need, provide minimal context, get the deliverable

Right agent fires

System routes each task to the correct specialized agent

Built on Claude Code

API-powered, runs on existing Claude Pro

Where It All Lives

Four layers. Each owns one job. Nothing overlaps.

Google Drive

ASSETS ONLY

- Raw photography by drop
- Graphics & brand assets
- Large export files
- Shared with collaborators

Not for: copy, docs, or projects

Claude Code

THE ENGINE

- All 12 agents run here
- Brand voice doc as context
- Command center interface
- Shapiro operates

Not for: storage or documentation

Notion

THE OPERATING HUB

THE BRAIN

Brand voice document · Strategy & playbook ref · Agent context files

STUDIO

Campaign & drop projects · Production timelines · Task lists per campaign

CONTENT VAULT

All approved copy · Caption & email drafts · Briefs by collection

Claude pushes directly into Notion via API

Notion — The Operating Hub

Claude pushes directly into Notion via API · Amon reviews here · All copy, projects, and tasks live here

THE BRAIN

Brand voice doc · Strategy ref · Agent context

STUDIO

Campaign projects · Production timelines · Task lists

CONTENT VAULT

Approved copy · Caption drafts · Briefs by drop

Platforms

Klaviyo · Shopify · IG

HOW IT FLOWS

1. Brand voice → every agent
2. tasks command center
3. Agent output → Notion
4. Amon reviews + approves

Agents Executing The Five Phases

01	KLAVIYO Wks 1–3	**Agent: Klaviyo Builder**	Flow logic, email copy, segment definitions, capture points
02	CONTENT Wks 3–6	**Agent: Instagram Curator + Content Creator**	12-week calendar, caption drafts, editorial series briefs
03	INFLUENCER Wks 6–9	**Agent: Influencer Researcher**	Creator shortlist, scoring sheet, outreach draft messages
04	DROP SYSTEM Wks 9–12	**Agent: Drop Launch Orchestrator**	Full drop copy pack — email, SMS, social, T-14 to T+3
05	WHOLESALE & PR Wks 12–16	**Agent: Outbound Strategist**	Wholesale outreach, press pitches, partner target list

Test Before It Touches the Brand

01 Agent Generates

Deliverable produced based on brand voice doc and playbook specs

02 Demo Account Test

Klaviyo demo, test Shopify store, fake subscriber list — sandbox validation

03 Human Review

You or Amon checks output against brand standards. Flag anything off.

04 Voice Edit

5–10 minute pass to add Amon's natural language where needed

05 Go Live

Validated output implemented in real platforms. Monitoring on.

What AI Does vs. What Stays Human

AI HANDLES	STAYS HUMAN
✓ Klaviyo flow logic + email structure	★ Final caption voice + edit
✓ Content calendar generation	★ Creative direction for editorial series
✓ Caption first drafts	★ Influencer personal outreach
✓ Creator research + scoring	★ Editor + press relationships
✓ Drop launch copy packs	★ Wholesale partner conversations
✓ Analytics + KPI dashboards	★ Drop creative vision
✓ Wholesale outreach first drafts	★ Brand instinct + gut checks

Build Sequence

1	**Brand Voice Doc** Scrape public data + capture Amon's raw voice input	You + Amon	**Next**
2	**Customize Agents** Fork repo, inject NOMA context into 8 agent .md files	AI build	Week 1
3	**Command Center** Simple interface built on Claude Code + API	AI build	Week 1–2
4	**Phase 1 Test** Agent generates Klaviyo deliverables, demo account validation	You	Week 2
5	**Go Live** Validated outputs go into real platforms. System is running.	Amon	Week 3

The Strategy is Written.

The Playbook is Built.

Now We Build The Machine.

1. **Brand Voice Doc — next task**
2. 8 agents customized for NOMA
3. Command Center interface
4. Phase 1 live in 3 weeks
